

Ridgeback roller coaster

1 Ride Overview

Ridgeback is a steel roller coaster with 6,694 ft of track and 5 inversions. A ride lasts 121 s and reaches a maximum speed of 68.6 mph.

The lift hill rises 178 ft. The first drop falls 237 ft at an angle of 72.4°, and the maximum vertical acceleration is 3.8 g.

2 Trains

The ride operates 3 trains of 6 cars, each car seating 4 riders, for an hourly capacity of 1,231 riders/h. An empty train weighs 13,240 lb.

3 Track Elements

Table 1. Track elements

Element	Height (ft)	Entry speed (mph)	Peak g
First drop	237	47.6	2.3
Vertical loop	154	56.6	2.6
Zero-g roll	57	56.3	1.7
Camelback	100	48.7	2.8

4 Structure

The track is carried on 312 support columns using 971 tons of steel. The structure shall withstand a design wind speed of 98 mph (3-second gust). The station platform is 105 ft long.
