Cyclone roller coaster

1 Ride Overview

Cyclone is a steel roller coaster with 6,112 ft of track and 3 inversions. A ride lasts 152 s and reaches a maximum speed of 74.5 mph.

The chain lift rises 195 ft. The main drop falls 208 ft at an angle of 71.6°.

2 Trains

The ride operates 2 trains of 6 cars, each car seating 4 riders, for an hourly capacity of 1,174 riders/h. An empty train weighs 12,375 lb. Each train is 63 ft long.

3 Track Elements

Table 1. Track elements

Element	Height (ft)	Entry speed (mph)	Peak g
Main drop	208	54.4	2.8
Vertical loop	68	52.6	3.4
Heartline roll	76	47.2	2.1
Airtime hill	80	62.7	2.2
Bunny hop	69	55.9	2.4

4 Structure

The track is carried on 276 steel bents using 951 tons of steel. The structure shall withstand a design wind speed of 110 mph (3-second gust).
